MEMORANDUM FOR : Acting Deputy Director (Support)

25X1A

SUBJECT : Request for Exception to Regulation  
Relative to Temporary Storage of Effects

REFERENCE : Memo to DD/A from AC/DPB, dtd 9 Sept 60, Same  
Subj: (b)(1)

25X1A

1. This memorandum contains a recommendation for the Acting Deputy Director (Support). Such recommendation is contained in paragraph 5.

25X1A

2. In reference memorandum the Deputy Director (Support) granted exceptions in the case of three specified individuals to keep household effects in storage up to one year from date of arrival at current PCS point. This exception to R [REDACTED] was based on the circumstances surrounding the sudden closing of the project base [REDACTED] as well as the savings that would be realized by the government through such a procedure. At the time the request was submitted it was decided not to include [REDACTED] who was the only other individual recommended by the Station for such consideration, due to the fact that he would not have completed his overseas tour within a year of the return home but would have approximately 20 months to go. Circumstances since then have prompted us to re-open the case by this memorandum.

25X1A

25X1A

3. [REDACTED] arrived at his present PCS post on the West Coast 23 August 1960. Normally he would have had until 23 November 1960 or until he secured permanent quarters, whichever came first, to store effects at government expense. After that time he would have had to ship them to the west coast or continued them in storage after 23 November at his own expense. Since his return to the States [REDACTED] has been involved in two extended stagings of his detachment, and is even now on one at an overseas post. Under these conditions it seemed more advisable to him to maintain his family in furnished quarters which he has done. At the same time his decision was influenced by the fact that his Career Service (CS) hopes to be able to reassign him directly overseas from his present U. S. Field Station assignment. This reassignment could take place on short notice, but presumably not later than May 1961 which would have ended his previous overseas tour had not the detachment returned.

4. Insofar as savings to the government are concerned the same situation prevails in the long case as in the three previously approved. Logistics advises that the cost of storage of [REDACTED] household effects is \$11.84 per month. Based on a 20 month computation total storage charges would be \$236.80. It has been ascertained that to ship the same effects from Washington to California would cost the government \$562.40. The savings to the government are, therefore, quite considerable.

25X1A

25X1A

5. In view of the factors presented it is recommended that an exception be made to paragraph 6 C of Regulation [REDACTED] that:

a. [REDACTED] be authorized to continue storage of household effects for a period not to exceed May 1961, unless reassignment at that time is overrulen in which case normal regulations governing such actions would prevail.

25X1A

25X1A

b. In the event [REDACTED] is returned to Washington PC his case be handled the same as any returnee to headquarters duty, and he be allowed to keep the effects in storage at government expense not to exceed 90 days after arrival at Washington PC post or securing of permanent housing whichever come first.

SIGNED

JAMES A. COLEMAN, JR.  
Acting Chief, DPA-CH/7

Recommendation in Paragraph 3 APPROVED:

25 JAN 1961

G. Gates Lloyd  
Acting Deputy Director (Support)
